AnalystAccelerator.ai

from RedCompass Labs

AnalystAccelerator is a multi-agent,
applied-AI solution designed specifically to
speed up payments modernization for banks.

- 20+ years of global payments expertise in one Applied-AI solution

- Supercharge your analysts and accelerate project delivery

- Reduce project timelines by up to 45% using Applied AI

- Cut payments project costs by up to 28%

Unlocking Potential:
Accelerating the Role of the Analyst

AnalystAccelerator integrates a payments-specific AI model with your existing project workflows to drastically speed up payments modernization, lower costs and improve output quality.

Generates accurate, detailed documentation across your payments teams

Builds payments knowledge throughout your organization

Ensures accuracy, transparrency and accountability in its outputs

...all while retaining human control.

Comprehensive, Expert and Always Up To Date

AnalystAccelerator includes all scheme, regulator, public documentation, and curated thought leadership from around the world.

Built on the latest LLM models, AnalystAccelerator completes complex tasks with an expert-in-the-loop, while operating within the specific context of your business and project management frameworks.

AnalystAccelerator Combines

- The collective knowledge of RedCompass Labs' payments experts

- Institutional knowledge from your in-house experts

- The latest regulatory guidelines, rulebooks and updates

- Your unique project requirements and formatting guidelines.

Capture and Retain Institutional Knowledge

AnalystAccelerator, enables you to capture and retain institutional knowledge from your experts and make it instantly available to your teams.

- Receive informed and detailed answers, even when your experts are unavailable

- Reduce knowledge churn across your business

- Provide unlimited access to all your internal expertise 24/7.

Documentation: Precision, Speed, and Quality

AnalystAccelerator creates detailed, accurate Epics, User Stories, Business Requirements, Test Scripts and more using your product and project documentation or from workshop notes, internal chat tools, JIRA or Confluence pages.

On-Demand Expertise to Accelerate Payments Modernization

- Based on a global reservoir of embedded, up-to-date payments knowledge.

- Increase development productivity: Instead of waiting for responses from busy Business Analysts, developers can get answers in real time.

- Enable seamless collaboration across your payments business, partners and offshore teams by unifying workspace tools and data.

- Stay in control: quickly make decisions informed by exact and detailed analysis to ensure your payment platforms remain compliant.
